Site Aliases: Federal Center ,2306 E. Bannister RD ,Kansas City,MO,64131 ;KANSAS CITY,1500 BANNISTER ROAD,KANSAS CITY,MO,66048;

Site Description: The Bannister Federal Complex is located at 1500 East Bannister Road, Kansas City, Jackson County, Missouri 64131. As previously discussed, the Site consists of the GSA-managed western portion of the BFC. The original BFC development included the KCP, which was established in 1942 to build aircraft engines for the U.S. Navy. After World War II, manufacture of aircraft engines continued on the west side of the complex until the 1960s, while manufacture of non-nuclear components for nuclear weapons began at the KCP on the east side in 1949. The KCP continues to manufacture non-nuclear components and to machine electrical, electromechanical, mechanical, and plastic components.

Activities conducted by the DOE at the KCP under the RCRA corrective action program have included remediation of soil contaminated with polychlorinated biphenyls (PCBs), chlorinated volatile organic compounds (CVOCs), and petroleum hydrocarbons; lining of storm sewers to reduce PCB discharges to surface water; and collection and treatment of groundwater contaminated with CVOCs .

Site Description: Currently owned and FUD: USACE property #B07MO0032 - This is the Whole site minus the DOE KC Plant The original site, consisting of 394 acres was purchased by the Government in 1942. Copies of the original deeds have not been acquired to date, however, Jackson County, MO, records show that the property was purchased by the Defense Plant Corporation (DPC). Records also indicate that portions of the site were operated as an aircraft engine plant by Pratt-Whitney for the U.S. Navy. Documentation of a transfer of property from the DPC to the U.S. Navy has not been located. It is not known whether otherGovernment agencies and/or private companies also operated at the site during this 1942 to 1945 period.
